# Career Research

### Student Materials

Pencil and paper or computer/printer

Resources to research careers

Examples:

Online sites

America's Career Infonet

<http://www.acinet.org/acinet/>

Books

Magazines

Personal interviews

### Directions

Choose a career associated with the sheep industry that you are interested in finding out more about. The career may be a "hands-on" career such as veterinarian or producer. The career may also be related to the sheep industry such as writing for agricultural publications, teaching, sales representative for sheep-related products, or advertising/marketing for sheep related products/associations.

Write a paper over the career that is at least two pages in length. Answer questions about the career in your paper such as:

- What is the title of the career? Why did you choose that specific career?
- How does the career relate to the sheep industry?
- What types of businesses or organizations hire for this career?
- What type of degree or training is required for the career?
- What is the salary range or the average salary?
- What are some specific skills required for this career?
- What are some specific duties/responsibilities of this career?
- What are the working conditions and hours?

# Research a Sheep Breed

### Student Materials

Pencil and paper or computer/printer

Resources to research breeds

Examples:

Online sites

Books

Magazines

Personal interviews

### Directions

Choose a sheep breed that you are interested in finding out more about. You may choose a breed listed in the unit or one from another source such as the Oklahoma State University Breeds of Livestock website <http://www.ansi.okstate.edu/breeds/sheep/>.

Write a paper over the breed that is at least two pages in length. Answer questions about the breed in your paper such as:

- Why did you choose that specific breed?
- Where did the breed originate?
- When was the breed introduced to the United States?
- What color is the breed?
- What are some distinguishing characteristics of the breed?
- What are considered to be some strong points of the breed?
- What are considered to be some weak points of the breed?
- How common is the breed in the United States?
- Is the breed often used for crossbreeding?
- How does the breed rate as a market animal?
- How does the breed rate as a wool animal? What type of wool does the breed produce?
- What is the average number of lambs born per ewe per lambing?
- Will the ewes breed out of season?
- What is the breed association?
- Does the breed association publish a magazine?
- If you were to go into the beef business, would you purchase this breed? Why or why not?

# Consumer Products

## Student Materials

Pencil

Resources on sheep products

## Introduction

Sheep products and by-products are used in many everyday items. The primary products from sheep are meat and wool but other products such as milk products have niche markets. Sheep products such as lanolin are used in lotions and moisturizers. Using resources, such as websites, catalogs, or visiting local grocery/health stores determine one item for each category. Briefly describe the item and list the price (if available). If the price is available, explain how it differs from other similar items not made from sheep products. For example, is cheese made from sheep's milk more expensive than other cheeses?

1. Milk Product (Example: cheeses)

---

---

2. Cosmetic (Example: Lotions or moisturizers)

---

---

3. Meat (Example: Lamb chops)

---

---

4. Wool (Example: Merino wool sweater)

---

---

5. Other (Example: Fertilizer, leather products such as UGG boots)

---

---
