Overview

This study guide is designed to help students prepare for the Pharmacy Technician assessment. It includes information about the assessment, the skills standards upon which the assessment is based, and test taking strategies.

Each of the sections in this guide provides useful information for students preparing for the Pharmacy Technician assessment.

- CareerTech and Competency-Based Education: A Winning Combination
- Pharmacy Technician assessment
 - ► Assessment Information
 - Standards and Test Content
 - Sample Questions
 - Test Taking Strategies
- Notes

This assessment is aligned with the Pharmacy Technician Certification Board and the National Pharmacy Technician Association.

For more information on the PTCB, please go to **www.ptcb.org.**

Information about the NPTA can be found at www.pharmacytechnician.org.

CareerTech and Competency-Based Education: A Winning Combination

Competency-based education uses learning outcomes that emphasize both the application and creation of knowledge and the mastery of skills critical for success. In a competency-based education system, students advance upon mastery of competencies, which are measurable, transferable outcomes that empower students.

Career and technology education uses industry professionals and certification standards to identify the knowledge and skills needed to master an occupation. This input provides the foundation for development of curriculum, assessments, and other instructional materials needed to prepare students for wealth-generating occupations and produce comprehensively trained, highly skilled employees demanded by the work force.

Tools for Success

CareerTech education relies on three basic instructional components to deliver competency-based instruction: skills standards, curriculum materials, and competency assessments.

Skills standards provide the foundation for competency-based instruction and outline the knowledge and skills that must be mastered in order to perform related jobs within an industry. Skills standards are aligned with national skills standards and/or industry certification requirements; therefore, a student trained to the skills standards is equally employable in local, state, and national job markets.

Curriculum materials and textbooks contain information and activities that teach students the knowledge and skills outlined in the skills standards. In addition to complementing classroom instruction, curriculum resources include supplemental activities that enhance learning by providing opportunities to apply knowledge and demonstrate skills.

Competency Assessments test the student over material outlined in the skills standards and taught using the curriculum materials and textbooks. When used with classroom performance evaluations, written competency assessments provide a means of measuring occupational readiness.

Each of these components satisfies a unique purpose in competency-based education and reinforces the knowledge and skills students need to gain employment and succeed on the job.

Measuring Success

Evaluation is an important component of competency-based education. Pre-training assessments measure the student's existing knowledge prior to receiving instruction and ensure the student's training builds upon this knowledge base. Formative assessments administered throughout the training process provide a means of continuously monitoring the student's progress towards mastery.

Written competency assessments provide a means of evaluating the student's mastery of knowledge and skills. Coaching reports communicate competency assessment scores to students and provide a breakdown of assessment results by standard area. The coaching report also shows how well the student has mastered skills needed to perform major job functions and identifies areas of job responsibility that may require additional instruction and/or training.

Pharmacy Technician Assessment Information

What is the Pharmacy Technician assessment?

The Pharmacy Technician assessment is an end-of-program assessment for students who have completed a Pharmacy Technician program. The assessment provides an indication of student mastery of knowledge and skills needed to succeed as a pharmacy technician.

How was the assessment developed?

The assessment was developed by the CareerTech Testing Center. Items were developed and reviewed by a committee of subject matter experts.

What does the assessment cover?

The assessment is aligned to the PTCB and the NPTA. Specifically, the test includes 80 multiple-choice test items.

Pharmacology for Technicians	14%
Pharmacy Law and Regulations	12%
Sterile and Non-Sterile Compounding	9 %
Medication Safety	14%
Pharmacy Quality Assurance	7%

Medication Order Entry and Fill Process17%Pharmacy Inventory Management9%Pharmacy Billing and Reimbursement9%Pharmacy Information System Usage
and Application9%

What are the benefits of using these assessments?

Students receive a competency certificate for each assessment they pass. This certificate is included in the student's portfolio and used to communicate their mastery of the subject matter to potential employers.

When should the assessment be taken?

The CareerTech Testing Center recommends students take this assessment as soon as possible after receiving all standards-related instruction, rather than waiting until the end of the school year.

Is the assessment timed?

No. However, most students finish the assessment within one hour.

What resources can students use on these assessments?

Students are allowed to use calculators and scratch paper on CTTC competency assessments; however, these items must be provided by the testing proctor and returned to the proctor before the student's exam is submitted for scoring. Calculator apps on cell phones and other devices may not be used on these assessments.

What accommodations can be made for students with Individualized Education Plans (IEPs)?

Accommodations are allowed for students with IEPs or 504s. Examples of allowable accommodations include:

- Extended time This assessment is not timed; therefore, students may take as much time as needed to finish. The assessment must be completed in one testing session.
- Readers A reader may be used to read the assessment to a student who has been identified as needing this accommodation.
- Enlarged text Students needing this accommodation can activate this feature by clicking the AA icon in the upper right corner of the screen.

What can students expect on test day?

All CTTC assessments are web-based and delivered exclusively by a proctor in the school's assessment center. The proctor **cannot** be an instructor or anyone who was involved with the student during instruction.

Assessments are delivered in a question-by-question format. When a question is presented, the student can select a response or leave the question unanswered and advance to the next question. Students may also flag questions to revisit before the test is scored. All questions must be answered before the test can be submitted for scoring.

After the assessment is scored, the student will receive a score report that shows the student's score on the assessment and how the student performed in each standard area.

Can students retake the test?

Students may retake the test unless their school or state testing policies prohibit retesting. Students who can retest must wait at least three business days between test attempts.

Pharmacy Technician Standards and Test Content

Duty I. Pharmacology for Technicians (II questions)

CODE	TASK	
1.01	Generic and brand names of pharmaceuticals.	
1.02	Therapeutic equivalence.	
1.03	Drug interactions (e.g., drug disease, drug-drug, drug-dietary supplement, drug-OTC, drug- laboratory, drug-nutrient).	
1.04	Strengths/dose, dosage forms, physical appearance, routes of administration, and duration of drug therapy.	
1.05	Common and severe side or adverse effects, allergies and therapeutic contraindications associated with medications.	
1.06	Dosage and indication of legend, OTC medications, and herbal and dietary supplements.	

Duty 2: Pharmacy Law and Regulations (10 questions)

CODE	TASK	
2.01	Storage, handling, and disposal of hazardous substances and wastes (e.g., SDS).	
2.02	Hazardous substances exposure, prevention, and treatment (e.g., eyewash, spill kit, SDS).	
2.03	Controlled substance transfer regulations (DEA).	
2.04	Controlled substance documentation requirements for receiving, ordering, returning, loss/theft, destruction (DEA).	
2.05	Formula to verify the validity of a prescriber's DEA number (DEA).	
2.06	Record keeping, documentation, and record retention (e.g., length of time prescriptions are maintained on file).	
2.07	Restricted drug programs and related prescription processing requirements (e.g., thalidomide, isotretinoin, clozapine).	
2.08	Professional standards related to data integrity, security, and confidentiality (e.g., HIPAA, backing up, and archiving).	
2.09	Requirement for consultation (e.g., OBRA '90).	
2.10	FDA's recall classification.	
2.11	Infection control standards (e.g., laminar air flow, clean room, hand washing, cleaning counting trays, countertop, and equipment) (OSHA, USP 795 and 797).	
2.12	Record keeping for repackaged and recalled products and supplies (TJC, BOP).	
2.13	Professional standards regarding the roles and responsibilities of pharmacists, pharmacy technicians, and other pharmacy employees (TJC, BOP).	
2.14	Reconciliation between state and federal laws and regulations.	
2.15	Facility, equipment, and supply requirements (e.g., space requirements, prescription file storage, cleanliness, reference materials) (TJC, USP, BOP).	
2.16	Requirements for administering vaccinations (BOP).	

Ducy 5: Sterne and Non-Sterne Compounding (7 questions)	
TASK	
Infection control (e.g., hand washing, PPE).	
Handling and disposal requirements (e.g., receptacles, waste streams).	
Documentation (e.g., batch preparation, compounding record).	
Determination of product stability (e.g., beyond use dating, signs of incompatibility).	
Selection and use of equipment and supplies.	
Sterile compounding processes.	
Non-sterile compounding processes.	

Duty 3: Sterile and Non-Sterile Compounding (7 questions)

Duty 4: Medication Safety (II questions)

CODE	TASK	
4.01	Error prevention strategies for data entry (e.g., prescription or medication order to correct patient).	
4.02	Patient package insert and medication guide requirements (e.g., special directions and precautions).	
4.03	Identification of issues that require pharmacist intervention (e.g., DUR, ADE, OTC recommendation, therapeutic substitution, misuse, missed dose).	
4.04	_ook-alike/sound-alike medications.	
4.05	High-alert/risk medications.	
4.06	Common safety strategies (e.g., tall man lettering, separating inventory, leading and trailing zeros, limiting use of error prone abbreviations).	

Duty 5: Pharmacy Quality Assurance (6 questions)

CODE	TASK	
5.01	Quality assurance practices for medication and inventory control systems (e.g., matching National Drug Code number, bar code, data entry).	
5.02	Infection control procedures and documentation (e.g., error prevention strategies).	
5.03	Risk management guidelines and regulations (e.g., error prevention strategies).	
5.04	Communication channels necessary to ensure appropriate follow-up and problem resolution (e.g., product recalls, shortages).	
5.05	Productivity, efficiency and customer satisfaction measures.	
5.06	Common safety strategies (e.g., tall man lettering, separating inventory, leading and trailing zeros, limiting use of error prone abbreviations).	

Duty 6: Medication Order Entry and Fill Process (14 questions)

CODE	TASK	
6.01	Order entry process.	
6.02	Intake, interpretation, and data entry.	
6.03	Calculation of doses required.	
6.04	Fill process (e.g., select appropriate product, apply special handling requirements, measure, and prepare product for final check).	
6.05	Labeling requirements (e.g., auxiliary and warning labels, expiration date, patient specific information).	
6.06	Packaging requirements (e.g., type of bags, syringes, glass, pvc, child resistant, light resistant).	
6.07	Dispensing process (e.g., validation, documentation, and distribution).	

Duty 7: Pharmacy Inventory Management (7 questions)

CODE	TASK	
7.01	unction and application of NDC, lot numbers, and expiration dates.	
7.02	Formulary or approved/preferred product list.	
7.03	Ordering and receiving processes (e.g., maintain par levels, rotate stock).	
7.04	Storage requirements (e.g., refrigeration, freezer, warmer).	
7.05	Removal (e.g., recalls, returns, outdates, reverse distribution).	

Duty 8: Pharmacy Billing and Reimbursement (7 questions)

CODE	TASK	
8.01	Reimbursement policies and plans (e.g., HMOs, PPO, CMS, private plans).	
8.02	Third-party resolution (e.g., prior authorization, rejected claims, plan limitations).	
8.03	Third-party reimbursement systems (e.g., PBM, medication assistance programs, coupon and self-pay).	
8.04	Health care reimbursement systems (e.g, home health, long-term care, home infusion).	
8.05	Coordination of benefits.	

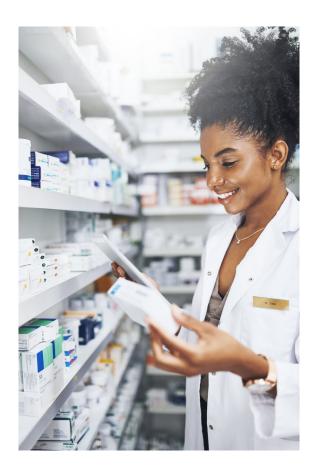

CODE	TASK
8.01	Reimbursement policies and plans (e.g., HMOs, PPO, CMS, private plans).
8.02	Third-party resolution (e.g., prior authorization, rejected claims, plan limitations).
8.03	Third-party reimbursement systems (e.g., PBM, medication assistance programs, coupon and self-pay).
8.04	Health care reimbursement systems (e.g, home health, long-term care, home infusion).
8.05	Coordination of benefits.

Duty 8: Pharmacy Billing and Reimbursement (7 questions)

Duty 9: Pharmacy Information System Usage and Application (7 questions)

CODE	TASK	
9.01	Pharmacy-related computer applications for documenting the dispensing of prescriptions.	
9.02	Databases, pharmacy computer applications, and documentation management (e.g., user access, drug database, interface, inventory report, usage reports, override reports, diversion reports).	

Sample Questions

- I. On a written prescription, what does NKDA stand for?
 - a. no known drug allergy
 - b. no health insurance
 - c. no current prescriptions
 - d. no over-the-counter prescriptions
- 2. A prescription is filled for eye drops with the directions 2gtt od tid. How many drops will a patient use a day?
 - a. 4
 - b. 6
 - c. 8 d. 12
 - u. 12
- 3. A prescription is written for Lipitor 10mg I po qd with 11 refills. The pharmacy has a 15% mark-up plus a \$4.50 dispensing fee. The cost for a 90-count bottle is \$233.15.

How much is a 30-day supply?

- a. **\$82.22**
- b. **\$93.87**
- c. **\$94.55**
- d. **\$95.16**
- 4. A compound is prescribed containing nystatin and hydrocortisone with a 2:1 ratio. If the pharmacy technician fills a prescription for 3 oz, how much nystatin is needed?
 - a. 15g
 - b. 30g
 - c. 45g
 - d. 60g

5. If federal law requires pharmacy records to be kept for two years, and state law requires pharmacy records to be kept for five years, how long should Oklahoma pharmacies retain pharmacy records?

a. two years - federal law supersedes state law

b. two years - the less stringent law applies to record retention

- A prescription is written for Boniva 150mg I tab po qhs monthly for one year. 6. Why should the pharmacy technician question this prescription? a. It does not come in the strength indicated. b. It should be taken in the morning. c. The prescription is only good for a 6-month supply. d. Nothing is wrong the prescription should be filled as written. 7. How many kilograms equal 60 lbs? a. 17.17 b. 23 c. 26 d. 27.27 8. A common side effect of narcotics is: a. constipation b. diarrhea c. increased respirations d. insomnia
 - 9. MSO4 is the abbreviation for:
 - a. morphine sulfate
 - b. magnesium sulfate
 - c. magnesium sulfate.
 - d. morphine sulfate
 - 10. When washing hands, the pharmacy technician must:
 - a. apply hand sanitizer
 - b. scrub vigorously with foaming soap
 - c. use an approved anti-microbial cleanser
 - d. use hot water

c. five years - state law supersedes federal law

d. five years - the more stringent law applies to records retention

Sample Questions — Key

- I. On a written prescription, what does NKDA stand for?
 - a. no known drug allergyb. no health insuranceIncorrect
 - c. no current prescriptions Incorrect
 - d. no over the counter prescriptions Incorrect
- 2. A prescription is filled for eye drops with the directions 2gtt od tid. How many drops will a patient use a day?
 - a. 4Incorrectb. 6Correctc. 8Incorrectd. 12Incorrect
- 3. A prescription is written for Lipitor 10mg I po qd with 11 refills. The pharmacy has a 15% markup plus a \$4.50 dispensing fee. The cost for a 90-count bottle is \$233.15. How much is a 30-day supply?

a. \$82.22	Incorrect
b. \$93.87	Correct
c. \$94.55	Incorrect
d. \$95.16	Incorrect

4. A compound is prescribed containing nystatin and hydrocortisone with a 2:1 ratio. If the pharmacy technician fills a prescription 7or 3 oz, how much nystatin is needed?

a.	I 5g	Incorrect
b.	30g	Incorrect
c.	45g	Incorrect
d.	60g	Correct

5. If federal law requires pharmacy records to be kept for two years, and state law requires pharmacy records to be kept for five years how long should the Oklahoma pharmacies retain pharmacy records?

ncorrect
Correct
ncorrect
20

6. A prescription is written for Boniva 150mg Itab po qhs monthly for one year. Why should the pharmacy technician question this prescription?

a. It does not come in the strength indicated.	Incorrect
b. It should be taken in the morning.	Correct
c. The prescription is only good for a 6-month supply.	Incorrect
d. Nothing is wrong the prescription should be filled as written.	Incorrect

7. How many kilograms equal 60 lbs?

a. 17.17	Incorrect
b. 23	Incorrect
c. 26	Incorrect
d. 27.27	Correct

8. A common side effect of narcotics is:

a. constipation	Correct
b. diarrhea	Incorrect
c. increased respirations	Incorrect
d. insomnia	Incorrect

9. MSO4 is the abbreviation for:

a. morphine sulfate	Correct
b. magnesium sulfate	Incorrect
c. magnesium sulfate	Incorrect
d. morphine sulfate	Incorrect

10. When washing hands, the pharmacy technician must:

a. apply hand sanitizer	Incorrect
b. scrub vigorously with foaming soap	Incorrect
c. use an approved anti-microbial cleanser	Correct
d. use hot water	Incorrect

Test Taking Strategies

This section of the study guide contains valuable information for testing success and provides a common-sense approach for preparing for and performing well on any test.

General Testing Advice

- I. Get a good night's rest the night before the test; eight hours of sleep is recommended.
- 2. Avoid junk food and eat right several days before the test.
- 3. Do not drink a lot or eat a large meal prior to testing.
- 4. Be confident in your knowledge and skills!
- 5. Relax and try to ignore distractions during the test.
- 6. Focus on the task at hand: taking the test and doing your best!
- 7. Listen carefully to the instructions provided by the exam proctor. If the instructions are not clear, ask for clarification.

Testing Tips

- I. Read the entire question before attempting to answer it.
- 2. Try to answer the question before reading the choices. Then read the choices to determine if one matches or is similar to your answer.
- 3. Do not change your answer unless you misread the question or are certain that your first answer is incorrect.
- 4. Answer questions you know first, so you can spend additional time on the more difficult questions.
- 5. Check to make sure you have answered every question before you submit the assessment for scoring; unanswered questions are marked incorrect.

NOTES
