

Descriptive Data Element Name: Other Procedure Codes (1-15)

XSD Data Type: xs: string

Element Name: oth_proc_code

Accepts Null values: Yes

Required in XSD: No

Minimum Constraint: 3

Maximum Constraint: 7

Definition: The ICD-10-CM code(s) that identifies all significant procedures other than the principal procedure performed during the patient's inpatient hospital stay covered by this discharge record. Report those that are most important for the episode of care and specifically any therapeutic procedures closely related to the principal diagnosis.

Comments: Up to 15 other procedure codes may be recorded. Enter codes in descending order of importance.

To code other Procedure codes:

- Enter all digits

Edit: Other Procedure field, if provided, must be:

- Present only if a principal procedure is present
- Valid
- Consistent with patient's sex and age
- Consistent with valid MSDRG
