

HealthChoice Preventive Care Services

Effective Jul. 1, 2024Released 08.07 2024

Preventive services are provided for overall health maintenance, such as routine health/wellness exams and tests, vaccinations, well-baby care and well-child care. Health screenings and wellness exams can discover problems you may not know you have. The earlier problems are found, the greater the opportunity for treatment.

The Department of Health and Human Services Affordable Care Act has defined preventive services, to be covered with no cost-share, as described in the U.S. Preventive Services Task Force A and B recommendations, the Advisory Committee on Immunization Practices (ACIP) of the Centers for Disease Control and Prevention (CDC), and certain guidelines for infants, children, adolescents and women supported by the Health Resources and Services Admin (HRSA) Guidelines including the American Academy of Pediatrics Bright Futures periodicity guidelines.

Certain services can be done for preventive or diagnostic reasons. When a service is performed for the purpose of preventive screening and is appropriately reported, it will be considered under the HealthChoice preventive care services benefit. Diagnostic services are considered under the HealthChoice standard plan benefits.

Preventive services are those performed on a person who has not had the preventive screening done before and does not have symptoms or other studies suggesting abnormalities, has had screening done within the recommended interval with the findings considered normal, or has had diagnostic services results that were normal after which the physician recommendation is for future preventive screening studies using the preventive services intervals.

Diagnostic services are services that are performed on a person who had a previous preventive or diagnostic study which identified an abnormality that requires additional diagnostic studies, or a recommendation was made for a repeat of the same studies within shortened time intervals from the recommended preventive screening time intervals, or who had a symptom(s) that required further diagnosis or does not fall within the applicable population for a recommendation or guideline.

HealthChoice covers qualifying preventive care services at 100% of allowable amounts when rendered by a participating network provider. Qualifying coverage may be determined by age, gender or other factors. There could be certain codes not payable in all circumstances due to other polices or guidelines, including coverage limitations or exclusions, and/or certification may be required for coverage. If you receive services during a preventive care visit other than for qualifying preventive care, you may have to pay for those services.

For more details or questions on qualifying preventive care services and coverage please contact customer care at 800-323-4314 and a member advocate will be happy to assist you.

periodic prostate-specific antigen		Requires one of the diagnosis
(PSA)–based screening for prostate		codes listed in this row for
cancer should be an individual one.		84152, 84153, 84154, G0102,
Before deciding whether to be		G0103
screened, men should have an		
opportunity to discuss the potential		
benefits and harms of screening with		
their clinician and to incorporate their		
values and preferences in the		
decision. Screening offers a small		
potential benefit of reducing the		
chance of death from prostate cancer in some men. However, many men		
will experience potential harms of		
screening, including false-positive		
results that require additional testing		
and possible prostate biopsy; over		
diagnosis and overtreatment; and		
treatment complications, such as		
incontinence and erectile dysfunction.		
In determining whether this service is		
appropriate in individual cases,		
patients and clinicians should		
consider the balance of benefits and		
harms on the basis of family history,		
race/ethnicity, comorbid medical		
conditions, patient values about the		
benefits and harms of screening and		
treatment-specific outcomes, and		
other health needs. Clinicians should		
not screen men who do not express a		
preference for screening.

These codes do not have a diagnosis code requirement for preventive benefits to apply.

Vaccinations are additionally covered under the pharmacy benefit at 100% without having to meet the pharmacy deductible for Basic/High Option Plans or the combined pharmacy and medical deductible for High Deductible Health Plan

Category:	Code(s):	Description:	Trade Name(s): (See Note Above)	Age Group: (Pediatric, Adult, or Both)	Benefit Limits: Age / Other (See Note above)
Diphtheria, tetanus toxoids, acellular pertussis and polio inactive (DTap-IPV)	90696	Diphtheria, tetanus toxoids, acellular pertussis vacc and inactivated poliovirus vacc (DTaP-IPV), when admin to children 4 through 6 years of age, for intramusc use	Kinrix® Quadracel®	Pediatric	For applicable age see code description.
Diphtheria, tetanus toxoids, acellular pertussis and polio inactive (DTap-IPV)	90697	Diptheria, tetanus toxoids, acellular pertussis, inactivated polivirus vacc, haemophilus influenza type B PRP-OMP conjugate, and hepatitis B (Dtap-IPV-Hib-HepB)	Vaxelis®	Pediatric	Age 0-4 years (ends on 5 th birthday)
Diphtheria, tetanus toxoids, acellular pertussis, haemophilus influenza B, and polio inactive (DTap-IPV/Hib)	90698	Diphtheria, tetanus toxoids, acellular pertussis vacc, Haemophilus influenza type b, and inactivated poliovirus vacc, (DTaP-IPV/Hib), for intramusc use	Pentacel®	Pediatric	Ages 0-4 years (ends on 5 th birthday)
Diphtheria, tetanus, acellular pertussis (DTap)	90700	Diphtheria, tetanus toxoids, and acellular pertussis vacc (DTaP), when admin to indiv younger than 7 years, for intramusc use	Daptacel® Infanrix®	Pediatric	For applicable age see code description.
Diphtheria, tetanus and acellular pertussis, hep B, and polio inactive (DTaP-HepB-IPV)	90723	Diphtheria, tetanus toxoids, acellular pertussis vacc, hepatitis B, and inactivated poliovirus vacc (DTaP-HepB-IPV), for intramusc use	Pediarix®	Pediatric	Ages 0-6 years (ends on 7 th birthday)
Dengue	90587	DENGUE VACC QUADRVLNT, LIVE, 3 DOSE SCHED, FOR SUBCUT USE	Dengvaxia®	Pediatric	Ages 9-16 years (ends on 17th birthday)

Hepatitis A	90632	Hepatitis A vacc (HepA), adult DOS, for intramusc use	Havrix® VAQTA®	Adult	For applicable age see code description.
	90633	Hepatitis A vacc (HepA), pediatric/adolescent DOS-2 dose Sched, for intramusc use	Havrix® VAQTA®	Pediatric	For applicable age see code description.
	90636	Hepatitis A and hepatitis B vacc (HepA-HepB), adult DOS, for intramusc use	Twinrix®	Adult	For applicable age see code description.
Haemophilus influenza b (Hib)	90647	Haemophilus influenza b vacc (Hib), PRP-OMP Conj, 3 dose Sched, for intramusc use	PedvaxHIB®	Both	For applicable age see code description.
	90648	Haemophilus influenza b vacc (Hib), PRP-T Conj, 4 dose sched, for intramusc use	ActHIB® Hiberx®	Both	For applicable age see code description.
Hepatitis B	90739	Hepatitis B vacc (HepB), CpG-adjuvanted, adult DOS, 2 dose or 4 dose Sched, for intramusc use	HEPLISAV-B®	Adult	Ages 18 and older
	90740	Hepatitis B vacc (HepB), dialysis or immunosuppressed patient DOS, 3 dose Sched, for intramusc use	Recombivax HB®	Both	-
	90743	Hepatitis B vacc (HepB), adolescent, 2 dose Sched, for intramusc use	Recombivax HB®	Pediatric (adolescent only)	For applicable age see code description.
	90744	Hepatitis B vacc (HepB), pediatric/adolescent DOS, 3 dose Sched, for intramusc use	Recombivax HB® Engerix-B®	Pediatric	For applicable age see code description.
	90746	Hepatitis B vacc (HepB), adult DOS, 3 dose Sched, for intramusc use	Recombivax HB® Engerix-B®	Adult	For applicable age see code description.
	90747	Hepatitis B vacc (HepB), dialysis or immunosuppressed patient DOS, 4 dose Sched, for intramusc use	Engerix-B®	Both	-
	90759	HEPATITIS B vacc (HepB), 3- ANTIGEN (S, PRE-S1, PRE- S2), 10 MCG DOS, 3 DOSE SCHED, FOR INTRAMUSC USE	PreHevbrio™	Adult	Ages 18 and older
Human Papilloma Virus (HPV)	90651	Human Papillomavirus vacc types 6, 11, 16, 18, 31, 33, 45, 52, 58, nonavalent (9vHPV), 2 or 3 dose Sched, for intramusc use	Gardasil9®	Both	Ages 9-45 (ends on 46th birthday).
COVID-19 Vaccines	90480	IMM ADMN BY INTRAMSC INJ OF SEVR ACUT RESP SYNDR CORONAVIRUS 2 (SARS-COV-2) (CORONAVIRUS DIS [COVID-19]) VACC, SGL DS	Applies to all COVID-19 vaccine codes	Both	Ages 6 months and up. Refer to the COVID-19 vaccine product for applicable ages.

	91304	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, recombinant spike protein nanoparticle, saponin-based adjuvant, 5 mcg/0.5 mL dosage, for intramusc use	Novavax	Borth	Ages 12 years and older
	91318	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, 3 mcg/0.3 mL dosage, tris-sucrose formulation, for intramusc use	Pfizer	Pediatric	Ages 6 month through 4 years (ends on 5th birthday)
	91319	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, 10 mcg/0.3 mL dosage, tris-sucrose formulation, for intramusc use	Pfizer	Pediatric	Ages 5 years through 11 years (ends on 12th birthday)
	91320	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID- 19]) vaccine, mRNA-LNP, spike protein, 30 mcg/0.3 mL dosage, tris-sucrose formulation, for intramusc use	Pfizer	Both	Ages 12 years and older
	91321	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID- 19]) vaccine, mRNA-LNP, 25 mcg/0.25 mL dosage, for intramusc use	Moderna	Pediatric	Ages 6 month through 11 years (ends on 12th birthday)
	91322	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID- 19]) vaccine, mRNA-LNP, 50 mcg/0.5 mL dosage, for intramusc use	Moderna	Both	Ages 12 years and older
Immunization Administration Preventive when included as part of a preventive Immun.	90460	Immun admin through 18 years of age via any route of admin, with counseling by physician or other qualified health care prof; first or only component of each vacc or toxoid administered	N/A	Pediatric	For applicable age see code description.

He IthChoice

	90461	Immun admin through 18 years of age via any route of admin, with counseling by physician or other qualified health care prof; each add'l vacc or toxoid component admin (List sept in addition to code for primary proc)	N/A	Pediatric	For applicable age see code description.
	90471	Immun admin (includes percutaneous, intradermal, SUBCUT, or intramusc injections); one vacc (single or combination vacc/toxoid)	N/A	Both	-
	90472	Immun admin (includes percutaneous, intradermal, SUBCUT, or intramusc injections); each add'l vacc (single or combination vacc/toxoid) (List sept in addition to code for prim proc)	N/A	Both	-
	90473	Immun admin by intranasal or oral route; one vacc (single or combination vacc/toxoid)	N/A	Both	-
	90474	Immun admin by intranasal or oral route; each add'l vacc (single or combination vacc/ toxoid) (List sept in addtn to code for prim. proc)	N/A	Both	-
	96380	Admin of respiratory syncytial virus, monoclonal antibody, seasonal dose by intramusc INJ, w/counseling by phys or other qual health care prof	N/A	Pediatric	Ages 0-19 months (ends at age 20 months)
	96381	Admin of respiratory syncytial virus, monoclonal antibody, seasonal dose by intramusc INJ	N/A	Pediatric	Ages 0-19 months (ends at age 20 months)
	G0008	Admin of Influenza Virus Vacc	N/A	Both	N/A
	G0009	Admin of pneumococcal vacc	N/A	Both	-
	G0010	Admin of hepatitis B vacc	N/A	Both	-
	0771 (revenue code)	Vacc admin	N/A	Both	-
Seasonal Influenza ('flu') Note: Additional new	90653	Influenza vacc, inactivated (IIV), subunit, adjuvant, for intramusc use	Fluad®	Adult	Ages 65 years and up
seasonal flu Immunization codes that are recently FDA-approved, but are not listed here, may be eligible	90656	INFLUENZA VIRUS VACC SPLIT PRSRV FREE 3 YRS/> IM	AFLURIA®	Both	Ages 3 years and older
for preventive benefits as of the FDA approval date.	90657	INFLUENZA VIRUS VACCINE SPLIT VIRUS 6-35 MO IM	AFLURIA®	Pediatric	Ages 6-35 months
	90658	INFLUENZA VIRUS VACCINE SPLIT VIRUS 3/> YRS IM	AFLURIA®	Both	Ages 3 years and older

90661	INFLUENZA VACCINE CELL CULT PRSRV FREE IM	FLUCELVAX®	Both	Ages 6 months and older
90662	Influenza virus vacc (IIV), split virus, preservative free, enhanced immunogenicity via increased antigen content, for intramusc use	High Dose Fluzone®	Adult	Ages 65 years and older
90664	Influenza virus vacc, live (LAIV), pandemic formulation, for intranasal use	Flumist®	Both	Ages 2-49 years (ends on 50 th birthday)
90666	Influenza virus vacc (IIV), pandemic formulation, split virus, preservative free, for intramusc use	N/A	Both	-
90667	Influenza virus vacc (IIV), pandemic formulation, split virus, adjuvant, for intramusc use	N/A	Both	-
90668	Influenza virus vacc (IIV), pandemic formulation, split virus, for intramusc use	N/A	Both	-
90672	Influenza virus vacc, quadrivalent, live (LAIV4), for intranasal use	Flumist® (LAIV4)	Both	Ages 2-49 years (ends on 50 th birthday)
90674	Influenza virus vacc, quadrivalent (ccIIV4), derived from cell cultures, subunit, pres and antibiotic free, 0.5 mL DOS, for intramusc use	Flucelvax® Quadrivalent	Both	Ages 6 months and older
90682	Influenza virus vacc, quadrivalent (RIV4), derived from recombinant DNA, hemagglutinin (HA) protein only, pres and antibiotic free, for intramusc use	Flublok® Quadrivalent	Adult	Ages 18 years and older
90685	Influenza virus vacc, quadrivalent (IIV4), split virus, preservative free, 0.25 mL, for intramusc use	Afluria® Quadrivalent Fluzone® Quadrivalent	Pediatric	Ages 6-35 months
90686	Influenza virus vacc, quadrivalent (IIV4), split virus, preservative free, 0.5 mL DOS, for intramusc use	Afluria® Quadrivalent Fluarix® Quadrivalent FluLaval® Quadrivalent Fluzone® Quadrivalent	Both	Ages 6 months and older
90687	Influenza virus vacc, quadrivalent (IIV4), split virus, 0.25 mL DOS, for intramusc use	Fluzone® Quadrivalent	Pediatric	Ages 6-35 months
90688	Influenza virus vacc, quadrivalent (IIV4), split virus, 0.5 mL DOS, for intramusc use	Afluria® Quadrivalent FluLaval® Quadrivalent Fluzone® Quadrivalent	Both	Ages 6 months and older

	90689	Influenza virus vacc quadrivalent (IIV4), inactivated, adjuvanted, pres free, 0.25mL DOS, for intramusc use	-	Both	-
	90694	Influenza virus vacc, quadrivalent (allV4), inactivated, adjuvanted, pres free, 0.5 ml DOS, for intramusc use	Fluad® Quadrivalent	Adult	Ages 65 years and older
	90756	Influenza virus vacc, quadrivalent (ccIIV4), derived from cell cultures, subunit, antibiotic free, 0.5mL DOS, for intramusc use	Flucelvax Quadrivalent® (non-preservative free)	Both	Ages 6 months and older
	Q2035	Influenza virus vacc, split virus, when administered to indiv 3 years of age and older, for intramusc use (AFLURIA)	Afluria®	Both	For applicable age see code description.
	Q2036	Influenza virus vacc, split virus, when admin to indiv 3 years of age and older, or intramusc use (FLULAVAL)	Flulaval®	Both	For applicable age see code description.
	Q2037	Influenza virus vacc, split virus, when admin to indiv 3 years of age and older, for intramusc use	Fluvirin®	Both	For applicable age see code description.
	Q2038	Influenza virus vacc, split virus, when admin to indiv 3 years of age and older, for intramusc use (Fluzone)	Fluzone®	Both	For applicable age see code description.
	Q2039	Influenza virus vacc, not otherwise specified	N/A	Both	-
Measles, Mumps, Rubella (MMR)	90707	Measles, mumps and rubella virus vacc (MMR), live, for SUBCUT use	MMR II® Priorix®	Both	-
	90710	Measles, mumps, rubella, and varicella vacc (MMRV), live, for SUBCUT use	ProQuad®	Pediatric	Ages 1-12 years (ends on 13 th birthday)
Meningococcal (MenB; MenB-4C; MenB-FHbp; Hib-MenCY; MPSV4; MCV4; MenACWY-CRM)	90619	Meningococcal Conj vacc, serogroups A, C, W, Y, quadrivalent, tetanus toxoid carrier (MenACWY-TT), for intramusc use	MenQuadfi®	Both	N/A
	90620	Meningococcal recombinant protein and outer membrane vesicle vacc, serogroup B (MenB-4C), 2 dose Sched, for intramusc use	Bexsero®	Both	Ages 10 years and older
	90621	Meningococcal recombinant lipoprotein vacc, serogroup B (MenB-FHbp), 2 or 3 dose Sched, for intramusc use	Trumenba®	Both	Ages 10 years and older

	90623	MENINGOCOCCAL PENTAVALENT VACC, CONJ MEN A, C, W, Y- TETANUS TOXOID CARRIER, AND MENB- EHBP, FOR INTRAMUSC USE	PENBRYA®	Both	Ages 10 years to 25 years (ends on 26th birthday)
	90644	Meningococcal conj vacc, serogroups C & Y and Haemophilus influenza b vacc (Hib-MenCY), 4 dose Sched, when admin to children 2-15 months of age, for intramusc use	MenHibrix®	Pediatric	For applicable age see code description
	90734	Meningococcal conjugate vacc, serogroups A, C, W, Y, quadrivalent diphtheria toxoid carrier (MenACWY-D) or CRM197 carrier (MenACWY- CRM), for intramusc use	Menactra® Menveo®	Both	For applicable age see code description.
MonkeyPox	90611	SMALLPOX AND MONKEYPOX VACC ATTENUATED VACCINIA VIRUS, LIVE, NON- REPLICATING, PRESV FREE, 0.5 ML DOS, SUSP FOR SUBCUT USE	JYNNEOS®	Adult	Ages 18 years and older.
Pneumococcal polysaccharide (PPSV23)	90732	PNEUMOCOCCAL POLYSACCHARIDE VACC, 23-VALENT (PPSV23), ADULT OR IMMUNO-SUPPR PT DOS, WHEN ADMIN TO INDIV 2 YRS OR OLDER, FOR SUBCUTN OR INTRAMUSC USE	Pneumovax 23®	Both	For applicable age see code description.
Pneumococcal conjugate	90671	PNEUMOCOCCAL CONJ VACC, 15 VALENT (PCV15), FOR INTRAMUSC USE	Vaxneuvance®	Both	Ages 6 weeks and older
	90677	PNEUMOCOCCAL CONJ VACC, 20 VALENT (PCV20), FOR INTRAMUSC USE	Prevnar 20®	Both	Ages 6 weeks and older
Polio (IPV)	90713	POLIOVIRUS VACC, INACTIVATED (IPV), FOR SUBCUT OR INTRAMUSC USE	lpol®	Both	-
Respiratory Syncytial Virus (RSV)	90380	RESPTR SYNCYTIAL VIRUS, MONOCLONAL ANTIBODY, SEASONAL DOSE; 0.5 ML DOS, FOR INTRAMUSC USE	BEYFORTUS™	Pediatric	Ages 0-19 months (ends at age 20 months)
	90381	RESPTR SYNCYTIAL VIRUS, MONOCLONAL ANTIBODY, SEASONAL DOSE; 1 ML DOS, FOR INTRAMUSC USE	BEYFORTUS™	Pediatric	Ages 0-19 months (ends at age 20 months)
	90678	RESPTR SYNCYTIAL VIRUS VACCINE, PREF, SUBUNIT, BIVALENT, FOR INTRAMUSC USE	ABRYSVO™	Both	N/A

	90679	RESPTR SYNCYTIAL VIRUS VACCINE, PREF, RECOMBINANT, SUBUNIT, ADJUVANTED, FOR INTRAMUSC USE	AREXVY™	Adult	Ages 60 and older.
Rotavirus (RV1, RV5)	90680	ROTAVIRUS VACC, PENTAVALENT (RV5), 3 DOSE SCHED, LIVE, FOR ORAL USE	Rotateq®	Pediatric	Ages 0-8 months
	90681	ROTAVIRUS VACC, HUMAN, ATTENUATED (RV1), 2 DOSE SCHED, LIVE, FOR ORAL USE	Rotarix®	Pediatric	Ages 0-8 months
Tetanus and diphtheria (Td)	90714	TETANUS AND DIPHTHERIA TOXOIDS ADSORBED (TD), PRESRV FREE, WHEN ADMIN TO INDIV 7 YRS OR OLDER, FOR INTRAMUSC USE	Tenivac® Decavac® TDvax™	Both	For applicable age see code description.
Tetanus, diphtheria toxoids and acellular pertussis (Tdap)	90715	TETANUS, DIPHTHERIA TOXOIDS AND ACELLULAR PERTUSSIS VACC (TDAP), WHEN ADMIN TO INDIV 7 YRS OR OLDER, FOR INTRAMUSC USE	Adacel® Boostrix®	Both	For applicable age see code description.
Varicella (VAR) ('chicken pox')	90716	VARICELLA VIRUS VACC (VAR), LIVE, FOR SUBCUT USE	Varivax®	Both	-
Zoster / Shingles (HZV/ZVL, RZV)	90750	SHRINGRIX (SHINGLES) VACC (HZV), RECOMBINANT, SUBUNIT, ADJUVANTED, FOR INTRAMUSC USE	Shingrix®	Adult	Age 50 years and up.

Women's Preventive Health

These are the requirements of the Health Resources and Services Administration (HRSA). For additional services covered for women, refer to the Preventive Services section.

covered for women, refer to the Frever		
Service: A date in this column reflects when the listed rating was issued.	Code(s): Certain codes may not be payable in all circumstances due to other policies or guidelines; certification may be required.	Preventive Benefit Instructions:
Well-Woman Visits HRSA WPSI Requirement (Dec. 2021): Recommends that women receive at least one preventive care visit per year	Procedure Code(s): Well-Woman Visits: Refer to the Wellness Examinations row in the Preventive Care Services section.	Well-Woman Visits: Refer to the Wellness Examinations row in the Preventive Care Services section
beginning in adolescence and continuing across the lifespan to ensure the provision of all recommended preventive services, including preconception and many services	Prenatal Office Visits: Evaluation and Management (Office Visits): 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99417, G0463	Prenatal Office Visits: Requires a Pregnancy Diagnosis Code.

necessary for prenatal and inter- conception care, are obtained. The primary purpose of well-woman visits is the delivery and coordination of recommended preventive services as determined by age and risk factors. These services may be completed at a single or as part of a series of visits that take place over time to obtain all necessary services depending on a woman's age, health status, reproductive health needs, pregnancy	Pelvic Examination (add-on code): 99459 Prenatal Care (Antepartum) Visits: 59425, 59426	Pelvic Examination add-on code 99459: Preventive care services benefits may apply to 99459 when the related evaluation and management (office visit) code is applied to the preventive care services benefit. If not billed with the appropriate preventive E&M code, CPT code 99459 will process at standard benefits. Prenatal Care (Antepartum) Visits: Does not have diagnosis code requirements for the preventive benefit to
status, and risk factors. Well-woman visits also include pre-pregnancy, prenatal, postpartum and interpregnancy visits.	Global Obstetrical Codes: 59400, 59510, 59610, 59618	apply Global Obstetrical Codes: The routine, low-risk, prenatal visits portion of the code is covered as preventive. Does not have diagnosis code requirements for the preventive benefit to apply.
	Postpartum Care Visits (Outpatient): 59430 Diagnosis Code(s):	Postpartum Care Visits (Outpatient): Does not have diagnosis code requirements for the preventive benefit to apply.
	See <u>Pregnancy Diagnosis Codes.</u>	
Screening for Gestational Diabetes Mellitus HRSA Requirement (Jan. 2023): Recommends screening pregnant women for gestational diabetes mellitus after 24 weeks of gestation (preferably between 24 and 48 weeks of gestation) to prevent adverse birth outcomes. WPSI recommends screening pregnant women with risk factors for type 2 diabtes or GDM before 2 weeks of gestation - ideally at the first prenatal visit. Also see Diabetes Screening and Gestational Diabetes Mellitus Screening sections and Screening for Diabetes Mellitus After Pregnancy section.	Procedure Code(s): Diabetes Screening: 82947, 82948, 82950, 82951, 82952, 83036 Blood Draw: 36415, 36416 Diagnosis Code(s): Refer to the Pregnancy Diagnosis Codes.	Diabetes Screening: Requires a Pregnancy Diagnosis Code (regardless of gestational week). Blood Draw: Requires one of the diabetes screening procedure codes listed in this row AND one of the Pregnancy Diagnosis Codes. Note: If a diabetes diagnosis code is present in any position, the preventive benefit will not be applied. Refer to the Diabetes Diagnosis Code List.
Screening for Diabetes Mellitus After Pregnancy HRSA Requirement (Jan. 2023): Recommends screening for type 2 diabetes in women with a history of gestational diabetes mellitus (GDM) who are not currently pregnant and who have not previously been diagnosed with type 2 diabetes. Initial testing should ideally occur within the first year postpartum and can be conducted as early as 4-6 weeks postpartum. Women	Procedure Code(s): Diabetes Screening: 82947, 82948, 82950, 82951, 82952, 83036 Blood Draw: 36415, 36416 Diagnosis Code(s): Required Screening Diagnosis Codes (requires at least one): Z00.00, Z00.01, Z13.1 AND requires the following additional	Diabetes Screening: Requires one of the Required Screening diagnosis codes listed in this row AND Z86.32. No age limitation. Blood Draw: Requires one of the Diabetes Screening procedure codes listed in this row AND one of the Required Screening diagnosis codes listed in this row AND Z86.32.

who were not screened in the first year postpartum or those with a negative initial postpartum screening test result should be screened at least every 3 years for a minimum of 10 years after pregnancy. For those with a positive screening test result in the early postpartum period, testing should be repeated at least 6 months postpartum to confirm the diagnosis regardless of the type of initial test (e.g., fasting plasma glucose, hemoglobin A1c, in the first 6 months postpartum regardless of whether the test results are positive or negative because the hemoglobin A1c test is less accurate during the first 6 months postpartum. Also see Gestational Diabetes Mellitus Screening, Diabetes Screening, and Screening for Gestational Diabetes Mellitus.	code: Additional Diagnosis Code Required: Z86.32 (personal history of gestational diabetes)	Note: If a diabetes diagnosis code is present in any position, the preventive benefit will not be applied. Refer to the Diabetes Diagnosis Code List.
Screening for Urinary Incontinence The Women's Preventive Services Initiative recommends screening women for urinary incontinence annually.	Refer to the Wellness Examinations row in the Preventive Care Services section.	Refer to the Wellness Examinations row in the Preventive Care Services section.
Counseling for Sexually Transmitted Infections (STIs) HRSA WPSI Requirement (Dec. 2021): Recommends directed behavioral counseling by a health care clinician or other appropriately trained individual for sexually active adolescent and adult women at an increased risk for sexually transmitted infections (STIs). Recommends that clinicians review a woman's sexual history and risk factors to identify those at increased risk for STIs. Risk factors include, but are not limited to, age younger than 25 years, a recent history of an STI, a new sex partner, multiple partners, a partner with concurrent partners, a partner with an STI, and a lack of or inconsistent condom use. For adolescents and women not identified as high risk, counseling to reduce the risk of STIs should be considered, as determined by clinical judgment	Refer to the Wellness Examinations row in the Preventive Care Services section.	Refer to the Wellness Examinations row in the Preventive Care Services section.

Screening for Human Immunodeficiency Virus Infection

HRSA WPSI Requirement (Dec. 2021): Recommends all adolescent and adult women, ages 15 and older, receive a screening test for human immunodeficiency virus (HIV) at least once during their lifetime. Earlier or additional screening should be based on risk, and rescreening annually or more often may be appropriate beginning at age 13 for adolescent and adult women with an increased risk of HIV infection. A screening test for HIV is recommended for all pregnant women upon initiation of prenatal care with rescreening during pregnancy based on risk factors. Rapid HIV testing is recommended for pregnant women who present in labor with an undocumented HIV status.

Education and Risk Assessment: Refer to the Wellness Examinations row in the Preventive Care Services section.

Screening Tests:
Refer to the HIV (Human
Immunodeficiency Virus) Screening for
Adolescents and Adults row in the
Preventive Care Services section.

Education and Risk Assessment: Refer to the Wellness Examinations row in the Preventive Care Services section.

Screening Tests:
Refer to the HIV (Human
Immunodeficiency Virus) Screening for
Adolescents and Adults row in the
Preventive Care Services section.

Contraceptive Methods (Including Sterilizations)

HRSA WPSI Requirement (Dec. 2021): Recommends that adolescent and adult women have access to the full range of contraceptives and contraceptive care to prevent unintended pregnancies and improve birth outcomes. Contraceptive care includes screening, education, counseling, and provision of contraceptives (including in the postpartum period). Contraceptive care also includes follow-up care (e.g., management, evaluation and changes, including the removal, continuation, and discontinuation of contraceptives). WPSI recommends that the full range of U.S. Food and Drug Administration approved, granted, or cleared

Screening and Counseling for	Refer to the Wellness Examinations	Refer to the Wellness Examinations row
Interpersonal and Domestic Violence HRSA Requirement (Dec. 2016): Recommends screening adolescents and women for interpersonal and domestic violence, at least annually, and, when needed, providing or referring for initial intervention services. Interpersonal and domestic violence includes physical violence, sexual violence, stalking and psychological aggression (including coercion), reproductive coercion, neglect, and the threat of violence, abuse, or both. Intervention services include, but are not limited to, counseling, education, harm reduction strategies, and referral to appropriate supportive services. Also see Screening for Intimate Partner Violence (USPSTF).	row in the Preventive Care Services section.	in the Preventive Care Services section.
Breast Cancer Screening for Average-Risk Women HRSA Requirement (Dec. 2016): Recommends that average-risk women initiate mammography screening no earlier than age 40 and no later than age 50. Screening mammography should occur at least biennially and as frequently as annually. Screening should continue through at least age 74 and age alone should not be the basis to discontinue screening. These screening recommendations are for women at average risk of breast cancer. Women at increased risk should also undergo periodic mammography screening; however, recommendations for additional services are beyond the scope of this recommendation.	Refer to the Screening Mammography row in the Preventive Care Services section.	Refer to the Screening Mammography row in the Preventive Care Services section.

Requires one of the Code Group 2 diagnosis codes listed in this row.
HRSA Requirement (Dec. 2019): The Women's Preventive Services Initiative recommends screening for anxiety in adolescent and adult women, including those who are pregnant and postpartum. Optimal screening intervals are unknown and clinical judgement should be used to determine screening frequency. Given the high prevalence of anxiety disorders, lack of recognition in clinical practices, and multiple problems associated with untreated anxiety, clinicians should consider screening women who have not recently been screened. Also see Anxiety Disorders in Adults Screening (USPSTF); Screening for Anxiety in Children and Adolescents (USPSTF); Screening for Depression in Adults (USPSTF); Depression in Children and Adolescents (Screening) (USPSTF); Perinatal Depression – Preventive Interventions (Counseling) (USPSTF); and Depression Screening (Bright Futures).	Procedure Code(s): 96127 Diagnosis Code(s): Encounter for Screening Examination for Other Mental Health and Behavior Disorders: Z13.39	Limited to 3 per calendar year. Requires the diagnosis code listed in this row.
Preventing Obesity in Midlife Women HRSA Requirement (Dec. 2021): WPSI recommends counseling midlife women aged 40 to 60 years with normal or overweight body mass index (BMI) (18.5-29.9 km/m2) to maintain weight or limit weight gain to prevent obesity. Counseling may include individualized discussion of healthy eating and physical activity.	See the Wellness Examinations row in the Preventive Care Services section above. Revision Information

Revision	Summany of Changes
Date	Summary of Changes
8/7/2024	Updated USPSTF & Bright Futures recommendation language
	Under Preventive Services:
Effective: 07/1/2024	Screening Mammography
	Updated list of applicable codes
	Added codes will be shown in bold in above list. Updates may include the removal of codes.
	Under Preventive Services:
	Hepatitis B Virus Infection Screening HIV (Human Immunodeficiency Virus) Screening for Adelegaents and Adults
	HIV (Human Immunodeficiency Virus) Screening for Adolescents and Adults Under Preventive Vaccines:
	Seasonal Influenza ('flu')
	Geasonal milderiza (ilu)
	Updated list of Benefits
	Under Preventive Services:
	Colorectal Cancer Screening
	Wellness Examinations
	Under Expanded Women's Preventive Health
	Well-Women Visits
	Contraceptive Methods Under Preventive Vaccines:
	Diphtheria, tetanus and acellular pertussis, hep B, and polio inactive (DTaP-HepB-IPV)
	Seasonal Influenza ('flu')
	Pneumococcal conjugate
3/19/2024	Updated list of applicable codes
	Added codes will be shown in bold in above list. Updates may include the removal of codes.
Effective:	Under Preventive Services:
04/1/2024	Pre-Diabetes and Type 2 Diabetes Screening
	Wellness Examinations Under Preventive Vaccines:
	Diphtheria and tetanus (DT)
	COVID-19 Vaccines
	Pneumococcal conjugate
	Under Expanded Women's Preventive Health
	Well-Women Visits
	Breast Feeding Equipment and Supplies
	Updated list of Benefits
	Under Preventive Services
	Wellness Examinations
	Under Expanded Women's Preventive Health
	Well Woman Visits
	Contraceptive Methods (Including Sterilizations)
02/14/2024	Updated USPSTF & Bright Futures recommendation language
Effective	Under Preventive Services:
Effective: 01/1/2024	HIV (Human Immunodeficiency Virus) Screening for Adolescents and Adults Depression and Suicide Pick in Adults Screening
01/1/2024	 Depression and Suicide Risk in Adults, Screening Depression and Suicide Risk in Children and Adolescents: Screening
	Anxiety in Children and Adolescents: Screening
	Anxiety in Gridden and Adolescents, Screening Anxiety Disorders in Adults, Screening
	Under Bright Futures:
	HIV Screening
	Under Expanded Women's Preventive Health:
	Screening for Anxiety

Updated list of Benefits

Under Preventive Vaccines:

- Monkeypox Vaccine
- Pneumococcal conjugate
- Respiratory Synctial Virus (RSV)
- Tetanus and diphtheria (Td)

Reorganized Benefit Outline

Under Preventive Services:

Colorectal Cancer Screening

Updated list of applicable codes

Added codes will be shown in bold in above list. Updates may include the removal of codes.

Under Preventive Services:

- Chlamydia Infection Screening
- Gonorrhea Screening
- Hepatitis B Virus Infection Screening
- HIV (Human Immunodeficiency Virus) Screening for Adolescents and Adults
- Colorectal Cancer Screening
- Healthy Diet and Physical Activity for Cardiovascular Disease Prevention in Adults with Cardiovascular Risk Factors: Behavioral Counseling Interventions
- Prevention of Acquisition of HIV: Pre-exposure Prophylaxis

Under Bright Futures:

 Sudden Cardiac Arrest (SCA) and Sudden Cardiac Death (SCD) – Risk Assessment and ECG Screening

Under Preventive Vaccines:

- COVID-19 Vaccines
- Immunization Administration
- Meningococcal Vaccine
- Monkeypox Vaccine
- Respiratory Synctial Virus (RSV)

9/29/2023

Updated Preventive Service Title

Under Preventive Services

Effective: 10/1/2023

- Hypertensive Disorders of Pregnancy: Screening; previously titled Preeclampsia Screening
- Prevention of Acquisition of HIV: Pre-exposure Prophylaxis; previously titled Prevention of Human Immunodeficiency Virus (HIV) Infection: Pre-exposure Prophylaxis

Updated USPSTF & Bright Futures recommendation language

Under Preventive Services

- Hypertensive Disorders of Pregnancy: Screening
- Prevention of Acquisition of HIV: Pre-exposure Prophylaxis

Under Expanded Women's Preventive Health

- Screening for Gestational Diabetes Mellitus
- Screening for Gestational Diabetes Mellitus After Pregnancy

Updated list of Benefits

Under Preventive Services

- Screening for Lung Cancer with Low-Dose Computed Tomography
- Folic Acid Supplementation to Prevent Neural Tube Defects: Preventive Medication

Updated list of applicable codes

Added codes will be shown in bold in above list. Updates may include the removal of codes.

Under Preventive Services:

Syphilis Screening

Under Preventive Vaccines:

COVID-19 Vaccines
