

2021 Highway Safety Crash Facts Book

Alcohol and Drug-Related Crashes

- Alcohol-Related Crashes
 - Alcohol-related crashes – statewide
 - Statewide crashes by county and severity..... pp. 88-89
 - Crashes by highway class.....p. 90
 - Number of vehicles involved..... p. 90
 - Crashes by time (month, day, time of day)..... p. 91
 - Alcohol-related crashes in cities
 - Crashes in cities by city and severity..... pp. 92-93
 - Persons in Alcohol-Related Crashes
 - Persons in statewide crashes by county and injury severity ... pp. 94-95
 - Persons in urban crashes by city and injury severity..... pp. 96-97
 - Drivers with an Alcohol-Related Condition in Crashes
 - Drivers in crashes by age and injury severity..... p. 98
 - Drivers in crashes by age and gender..... p. 99
 - Driver contributing factors in alcohol-related crashes.....p. 100
- Drug-Related Crashes
 - Drug-related crashes – statewide
 - Statewide crashes by county and severity.....pp. 101-102
 - Crashes by highway class.....p. 103
 - Number of vehicles involved..... p. 103
 - Crashes by time (month, day, time of day)..... p. 104
 - Drug-related crashes in cities
 - Crashes in cities by city and severity..... pp. 105-106
 - Persons in Drug-Related Crashes
 - Persons in statewide crashes by county and injury severity ... pp. 107-108
 - Persons in urban crashes by city and injury severity..... pp. 109-110
 - Drivers with a Drug-Related Condition in Crashes
 - Drivers in crashes by age and injury severity..... p. 111
 - Drivers in crashes by age and gender..... p. 111
 - Driver contributing factors in drug-related crashes..... p. 112

OHP indicates crashes worked by the Oklahoma Highway Patrol. These crashes are generally on rural roads and highways. Police indicates crashes worked by agencies (police, sheriff, campus police, etc.) other than the Oklahoma Highway Patrol. These crashes are generally worked within municipalities.

* A crash is categorized as “alcohol-related” when at least one driver in the crash has been categorized by law enforcement as having a condition of either “drinking, ability impaired” or “odor of alcoholic beverage” on the crash report form, and/or has a positive (0.01+) BAC (blood alcohol content) result in a blood or breath test.

ALCOHOL-RELATED CRASHES – STATEWIDE

Alcohol-Related Crashes Highway Class & Injury Severity						
Highway Class	Injury Severity					Total Crashes
	Fatal	Serious	Minor	Possible	None	
Rural US Highway	18	20	36	29	59	162
Interstate Highway	20	15	51	72	176	334

DRIVERS IN ALCOHOL-RELATED CRASHES

Driver Contributing Factor in Alcohol-Related Crashes (for drivers with an alcohol-related condition)*

* On the current Oklahoma crash report form, every driver in a crash is assigned a contributing factor for the crash. The majority of crashes caused by a driver with an alcohol-related condition had a contributing factor of “Alcohol DUI/DWI”. This accounted for 62.7% of all drivers in the category of “Alcohol-Related Crashes.” Therefore, it was left off of the above chart to show other contributing factors that were chosen on the crash report form. “Other Improper Act/Movement” includes failure to signal, disregarding warning signal, improper lane use, improper backing, sleepy driver, failure to secure load, and unknown/other movements.

OHP indicates crashes worked by the Oklahoma Highway Patrol. These crashes are generally on rural roads and highways. Police indicates crashes worked by agencies (police, sheriff, campus police, etc.) other than the Oklahoma Highway Patrol. These crashes are generally worked within municipalities.

* A crash is categorized as “drug-related” when at least one driver in the crash has been categorized by law enforcement as having a condition of either “illegal drugs” or “under the influence of medication” on the crash report form, and/or has a positive test for drugs in their system. This includes both prescription medications and illicit drugs. However, there is currently no quantification for a level of impairment for drugs, therefore, a positive drug test does not necessarily imply impairment.

DRIVERS IN DRUG-RELATED CRASHES

Driver Contributing Factor in Drug-Related Crashes (for drivers with a drug-related condition)*

* On the current Oklahoma crash report form, every driver in a crash is assigned a contributing factor for the crash. The majority of crashes caused by a driver with a drug-related condition had a contributing factor of “Drugs DUI”. This accounted for 42.9% of all crashes in the category of “Drug-Related Crashes.” Therefore, it was left off of the above chart to show other contributing factors that were chosen on the crash report form. “Other Improper Act/Movement” includes failure to signal, disregarding warning signal, improper lane use, improper backing, sleepy driver, failure to secure load, and unknown/other movements.
