

Appendix L: Construction Manual Review Summary

OKLAHOMA DEPARTMENT OF TRANSPORTATION

CONSTRUCTION MANUAL REVIEW					
#	SECTION	LOCATION	FEATURE	COMMENTS	STATUS
PLEASE NOTE: The following sections have no elements subject to compliance with the ADA standards and, therefore, no sheets reviewed.					
1	500	Entire Section	Structures	ADA is not mentioned specifically throughout this document. This document should layout ODOT's expectations for ADA compliance.	No Access Features Mentioned
2	501	Entire Section	Excavation and Backfill for Structures	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
3	502	Entire Section	Forms, Falsework and temporary works	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
4	503	Entire Section	Prestressed Concrete Bridge Members	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
5	504	Entire Section	Bridge Decks, Approaches, Rails and Parapets	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions..</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
6	505	Entire Section	Overlay of Concrete Bridge Decks	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
7	506	Entire Section	Structural Steel	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
8	507	Entire Section	Bearing Assemblies	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned

#	SECTION	LOCATION	FEATURE	COMMENTS	STATUS
10	509	Entire Section	Structural Concrete	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
11	510	Entire Section	Earth Retaining Systems and Sound Barrier Walls	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
12	511	Entire Section	Reinforcing Steel for Structures	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
14	512	Entire Section	Painting	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
15	513	Entire Section	Repair of Concrete Bridge Decks	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
16	514	Entire Section	Driven Foundation Piles	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
17	515	Entire Section	Penetrating Water Repellent Treatment	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
18	516	Entire Section	Drilled Shaft Foundations	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned

#	SECTION	LOCATION	FEATURE	COMMENTS	STATUS
19	517	Entire Section	Post-Tensioning	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
20	520	Entire Section	Structural Concrete Repair by Sealing and Injection	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
21	521	Entire Section	Pneumatically Applied Mortar	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions.</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
22	523	Entire Section	Concrete Surface Repair by Sealing	<p>Ensure any pedestrian elements that will be closed during this project have an accessible route around the project.</p> <p>Checklists at the end of the section should include relevant ADA Questions..</p> <p>Post construction audits should be completed according to the checklist developed through the Transition Plan process to ensure compliance with all ADA features altered or added.</p> <p>The Daily Work Report should include ADA Administration requirements developed by ODOT to ensure compliance is worked into the daily routine.</p>	No Access Features Mentioned
