PINNACLE PLAN MEASURES – MONTHLY SUMMARY REPORT – March 2020

The Department of Human Services (DHS) is committed to improving the safety, permanency, and well-being of children served by the child welfare system. Public reporting is critical to ensuring transparency and accountability of the current performance on the measures included in the Pinnacle Plan. The OKDHS Metrics, Baselines, and Targets Agreement -3/7/13 outlines how the outcomes and other indicators are to be measured and reported. Monthly, Quarterly, and Semi-Annual Reports will be made published on the OKDHS Infonet and made available to the public.

Oklahoma is committed to good faith efforts and positive trending toward the goals outlined in the plan. Each monthly report will include four performance areas, comprised of ten specific metric elements. These are: Foster Care Safety, Counts for New Foster Homes and TFC homes, Worker Contacts, and Shelter Usage. The demographics of children served during the reporting period are included in monthly and semi-annual reports as context data. This information is provided to assist in understanding the population being served by the child welfare system.

Beginning with the August 2014 Monthly Report, there has been a decrease in the lag time to 30 days from the end of the reporting period to the time that the data is reported on Measure 2 – Resource Homes, Measure 3 – Frequency of Worker Contacts, and Measure 5 – Shelter Use. There will continue to be a 90-day lag time on Measure 1 – Foster Care Safety to allow time for the Program Review Process to be completed.

OKDHS was the first state agency to have a federally approved Statewide Automated Child Welfare Information System (KIDS System) and continually strives for high quality data. **The data in this report is subject to change due to ongoing data entry, changes in policy, changes in practice, and changes in definitions, and/or data quality issues that may be discovered through the process.**

If you have questions or feedback regarding the Pinnacle Plan, please email us at dhs.childwelfareplan@okdhs.org

1.1: Maltreatment in Care by Resource Caregivers - November 2019

Data Source: Measure 1.1

	Dec-2018	Jan-2019	Feb-2019	Mar-2019	Apr-2019	May-2019	Jun-2019	Jul-2019	Aug-2019	Sep-2019	Oct-2019	Nov-2019
# of Substantiations	4	9	15	17	7	3	11	13	10	8	10	21

Data: The Maltreatment in Care Measure by Resource Caregiver incorporates a 90-day delay from the time the investigation is complete to the report date. This delay allows for further review which may result in changes in the findings. All substantiations on children in Out of Home Care will go through an automatic Program Review. The data reported reflects substantiations in the month that the investigation was completed and not necessarily in the month that the abuse or neglect occurred. This measure includes all children placed in traditional foster care homes, kinship homes (relative or non-relative), therapeutic foster care homes, group homes, shelters, and residential facilities. This measure also includes children substantiated of maltreatment by the Office of Client Advocacy while placed in institutional settings. Every time a child is a substantiated as a victim, that child will be counted in the monthly reporting. Children who are victimized more than once will be counted in each month their victimization is substantiated. Note: This is different from the federal metric, which counts each child only once, even if a child is victimized more than once in the course of a year.

Comments – March 2020: For the month of October 2019 there were a total of 10 substantiations of Maltreatment while in Out of Home Care. These victims were reported in 4 referrals for children in foster care and 3 referrals for children in OCA placements. Of the 5 children placed in foster care placements, 4 children were placed in a CWFC-kinship/relative home and 1 children was placed in a CW Foster Home. Of the 5 children placed in OCA placements, 3 children were placed in Level E Residential Resource Facilities and 2 children were placed at OCA-Psychiatric Res. Treatment Center. Of the 10 substantiated victims in October 2019, 3 had a substantiated finding of threat of harm only.

For the month of November 2019 there were a total of 21 substantiations of Maltreatment while in Out of Home Care. These victims were reported in 9 separate referrals for children in foster care. Of the 21 children placed in foster care, 10 children were placed in a CW Foster Family Care Home, 3 children were placed in a CWFC-Supported Home, 6 children were placed in a Kinship/Non-relative Foster Home, and 2 children were placed in a Kinship/Relative Foster Home. Of the 21 substantiated victims in November 2019, 8 victims had a substantiated finding of threat of harm only.

Data: The Maltreatment in Care by Parents measure incorporates a 90-day delay from the time the investigation is complete to the report date. This delay allows for further review which may result in changes in the findings. The data reflects substantiations in the month that the investigation was completed and not necessarily in the month that the abuse or neglect occurred.

Beginning with the November 2013 report, every time a child is a victim, that child will be counted. Children who are victimized more than once will be counted in each month their victimization is substantiated. Note: This is different from the federal metric, which counts each child only once, even if a child is victimized more than once in the course of a year. Also, children who are disclosing abuse that occurred prior to coming into DHS custody will not be included in the count of monthly victims.

Comments – March 2020: For the month of October 2019, there were 16 substantiations of abuse by parents of children in out of home care. These 16 victims were reported in 8 separate referrals. All 16 children were placed in trial reunification.

For the month of November 2019, there were 5 substantiations of abuse by parents of children in out of home care. These 5 victims were reported in 3 separate referrals. 4 children were placed in Trial Reunification and 1 child was placed in Therapeutic Foster Care.

Data Source: KIDS Data Quarterly Workload Summary Ending 12/31/19

Data: Utilizing the standards set forth in the Pinnacle Plan, each individual type of case is assigned a weight and then the weights are added up in order to determine a worker’s caseload. The consolidated workload tracking process allows Oklahoma to factor in the worker’s “Workload Capacity.” A snapshot is taken every morning at 12:00 am of the workload of all Child Welfare workers. The entire workload of workers with a qualifying assignment to a case (CPS, PP, FCS, Adoption, and Resource) are calculated and compared against the caseload standards. The workload is classified as meeting standards if it is 100% or below a caseload. If the workload is over 100% but less than 120% of a caseload, it is considered to be “over but close”; otherwise the workload is considered to be over the standard. The measure tracks each worker - each day to determine if they meet the standard, and this is called a “worker day”. Work performed by Child Welfare Specialists, is broken into multiple categories. This measure will look specifically at Permanency Planning, Preventive/Voluntary, Investigation, Adoption, Resource Family Specialist, Recruitment, and Adoption Transition Unit Workers. For reporting purposes, the Quarterly totals will be included, as well as a point in time percentage of the number of workers “meeting,” “close,” and “over” workload standards on the last day of the reporting period.

Comments – Jan 2020: As of 12/31/19, using the point in time YI768C Workload data report, the percentage of Child Welfare Workers meeting the standard is 86.7%, with 6.3% being “Close”, and 7.1% “Over Standard”. Of the 1516 workers, 1314 workers were meeting workload standards, 95 workers were close, and 107 workers were over the standard. For the period of Oct 1, 2019 – Dec 31, 2019, the quarterly data shows that the percentage of Child Welfare Workers “meeting” the standard is 79.9%, with 10.2% being “Close”, and 9.8% “Over Standard.”

Data: This measure looks at Supervisor Units in regards to the worker standard per unit. There are two parts to determine if a supervisor unit meets the standard. First, the measure looks at the number of Child Welfare Workers each supervisor is currently supervising in their unit. The target is for each unit to have a ratio of 5 Child Welfare Workers to 1 Supervisor. If a Unit has a ratio of 5:1 or less, they are considered to meet the standard. Units are “Close” if they are 1-20% over with a ratio of 6:1. All Units with a ratio of 7:1 or over are considered “Over”. Each worker accounts for 0.2% of a supervisor’s workload capacity. Secondly, the measure looks at any of those supervisors who are currently supervising caseload carrying workers and also have primary assignments on their own workload. Because these workload assignments deduct from a supervisor’s capacity to supervise their workers, this additional caseload must be factored into the measurement. Initially a supervisor was allowed to carry up to two case assignments, and those case assignments would not be calculated into the total workload. Any additional assignments on a supervisor’s caseload would then be calculated at the same case type weight as on the worker’s caseload and then combined with the supervisor capacity, which includes the number of workers supervised. Beginning with the reporting period ending December 2019, supervisors were no longer allotted the one or two assignments that did not add to the overall workload total. All assigned, countable work is now calculated into the supervisor’s workload. With this combined calculation of the supervisor’s workload capacity, it is then determined how many of these supervisor units are meeting the workload standard. This information is based on KIDS ORG data and HRMD Data and is point in time as of the last date of the reporting period.

Comments – Jan 2020: The total number of Child Welfare Supervisor Units “Meeting the Standard” is 70.1%, with 19.0% being “Close”, and 10.8% “Over Standard”. There are 378 supervisor units with 265 units meeting the standard, 72 units close and 41 units over the standard.
