OHCA awarded grant to streamline enrollment

The goal of providing 24-hour-a-day, seven-day-a-week access to SoonerCare enrollment via an online enrollment process is a step closer with the announcement that Oklahoma was awarded a \$6.1 million federal grant to create the process, according to Oklahoma Health Care Authority (OHCA) officials.

The award was announced today at the OHCA board meeting in Ada. The grant was awarded by the Centers for Medicare and Medicaid Services (CMS), the agency's federal partner.

The proposed project would create an alternative to the current paper application process by providing an online enrollment process that would quickly determine if Oklahomans qualify for any of the state's SoonerCare health coverage programs. The process will also inform the applicant of other health services that may be available. "OHCA's goals have always centered on improving health care access and satisfaction for participating Oklahomans. This grant allows us to develop a more streamlined, integrated and efficient system," said OHCA CEO Mike Fogarty. "Ultimately, it will look more like a commercial health care system by sharing information electronically with minimal contact with government offices. It will allow people to enroll not only at a Department of Human Services' office but at home and other places in the community such as libraries and hospitals or anywhere with Internet access."

The agency will receive the federal funds over the next two years to support the planning, design, development, testing, implementation and evaluation of this project. The online enrollment process would encompass creation and programming of a web-based online application and eligibility determination system, development of the necessary detailed policies and procedures, and technical support resources, including a help-desk system.
