 5. Adjourn—Next Tribal Consultation Scheduled for 11 AM, May 2nd, 2017

Proposed Rule, State Plan, and Waiver Amendments

17-01 Policy Revision to Comply with Fairness in Medicaid Supplemental Needs Trusts Act — The proposed revisions are necessary to comply with Federal regulation. The Fairness in Medicaid Supplemental Needs Trusts, adds language into the Social Security Act to give mentally competent disabled individuals the same right to create an exempt trust as a parent, grandparent, guardian, or court. The Fairness Act will apply to trusts established on or after Dec. 13, 2016. Other requirements of these types of trusts which are exempt from Medicaid resource limits remain unchanged.

17-02 Policy Revision to Revise Self-Employment Language in Insure Oklahoma Individual Plan Policy The proposed revisions to Insure Oklahoma Individual Plan policy strengthen program

integrity. Revisions will help ensure that self-employed applicants are engaged in routine, for-profit activity, in accordance with Federal Internal Revenue Service guidelines. The self-employed are one of the eligible populations who can enroll in the Insure Oklahoma Individual Plan.

I/T/U Reimbursement Outside of Four Walls — The proposed Indian Health Services, Tribal Program and Urban Indian Clinics (I/T/U) changes will allow I/T/Us who choose to contract as a Federally Qualified Health Center to be reimbursed at the Federal Office of Management and Budget rate for services provided outside of the four walls of their facility. Policy changes are needed to comply with Federal regulations.

Genetic Counseling — The proposed amendment to the State Plan will allow members to access genetic counseling after genetic testing has found that a member displays clinical features of a suspected genetic condition, is at direct risk of inheriting the genetic condition in question, or has been diagnosed with a condition where identification of specific genetic changes will impact treatment or management. Currently, the State Plan limits this service to women with a high-risk pregnancy.

Title XXI Health Service Initiative (HSI) — Due to an increase in the Children's Health Insurance Program Federal Medical Assistance Percentages for FY16 and FY17 to fund health service initiatives, the Oklahoma Health Care Authority (OHCA) is exploring two projects including one targeting blood lead screening test awareness and utilization and one that would provide safe sleeps cribs to hospitals to distribute to families in need as part of an existing partnership between the State Health Department and various birthing hospitals. State match will be provided by either partner agencies or by the OHCA. HSIs protect public health and/or the health of individuals, improves or promotes a state's capacity to deliver public health services, strengthen the human and material resources necessary to accomplish public health goals to improve children's health, and targets low-income children under 19. This item will have an expedited Tribal consultation comment period, March 7 – March 20.

Pharmacy State Plan Amendment — The proposed amendment to the State Plan will revise language to reflect the Oklahoma Health Care Authority's participation in the Sovereign States Drug Consortium for supplemental rebate negotiation. The amendment will also update the pharmacy coverage to specify that investigational drugs are not covered; even if they have been FDA approved but are part of a post marketing study or trial. This is a follow-up to the informational item presented at the January 3, 2017 Tribal consultation. This item will have an expedited Tribal consultation comment period, March 7 – March 20.
