

The State of Oklahoma approves the installation of hot applied and cold process roofing systems. These include low slope asphalt, coal-tar, and permamop built-up roofing (BUR), multi-ply modified bitumen and single-ply roofing systems of the Roofing Manufacturers listed below. This categorization does not include shingles and metal roofing systems. Foam roofing systems can be installed with prior approval on a case-by-case basis. These categories of roofing will be as specified by the Consultant of Record for each specific State Project. The State reserves the right to drop any manufacturer that does not verify and update their contact information on an annual basis.
