

Clean Water State Revolving Fund (CWSRF)  
Green Project Reserve Eligibility Determination

Name of System  
CWSRF Project Number/Loan Number

Altus Municipal Authority  
ORF-23-0030-CW

**General Project Description:**

Altus Municipal Authority (Authority) has a sanitary sewer loop which needs to be replaced to correct inflow and infiltration (I&I) issues caused by breaks in the sewer lines, brick manholes, and defects within the precast concrete manholes. Significant portions of the sewer lines are under pavement within the limits of the existing roadway. Also, the Authority has three other projects which need to be completed: a project to deliver treated grey water from the wastewater treatment plant to reuse to irrigate the municipal golf course and irrigating public spaces; rehabilitation the SE wastewater treatment plant; and relocation of sanitary sewer line and replacement of substandard manholes. The proposed project is to replace sanitary sewer lines in the current location by pipe bursting, replace sanitary sewer manholes as needed, and all appurtenances required to complete the project. Furthermore, the funds will be used to complete the other projects listed as the details and engineering reports become available.

**GPR Component Description:**

| Item                            | Category*         |
|---------------------------------|-------------------|
| Sanitary Sewer Line Replacement | Energy Efficiency |
|                                 | None              |
|                                 | None              |

|   |                       |
|---|-----------------------|
| Approved GPR Amount:                    | <u>\$4,323,120.00</u> |
| Approved Subsidy Amount (if applicable) | <u>\$0.00</u>         |
