Lawton-Ft. Sill Students Working Against Tobacco (SWAT) team exposed the dangers of tobacco during the United Way Youth Day of Caring.

TOBACCO'S TOLL

in oklahoma

It is startling to realize that more than 5 million U.S. children alive today will die prematurely from smoking-related illnesses. In fact, nearly every adult who smokes took his or her first puff at or before the age of 18.

How did we get here? In Oklahoma, the tobacco industry spends more than \$213 million each year marketing its deadly products. Published research studies have found that children are twice as sensitive to tobacco advertising as adults and are more likely to be influenced to smoke by cigarette marketing than by peer pressure. Fully one-third of underage experimentation with smoking is attributable to tobacco advertising

The tobacco industry's effort doesn't stop with marketing; it also spends time and money fighting policies that have been proven to reduce tobacco use and supporting laws that accommodate smoking in public places where children and young adults will experience tobacco use as a normal part of everyday life.

When Oklahoma children were asked what percentage of adults smoke, over 30 percent of them believe that more than 70 percent of adults are smokers. In reality, only 25 percent of Oklahoma adults smoke. If we have any hope of stemming the tide of children who experiment with cigarettes and go on to become regular, daily smokers, we must take action, personally and collectively, to protect our kids.

The good news is that through the tireless efforts of many concerned citizens, the trends in youth smoking are beginning to move in the right direction. The number of "committed non-smokers" among Oklahoma high school youth has increased from 33 percent in 2002 to over 40 percent in 2009. Among middle school youth the rate has increased from 52 percent in 2002 to over 64 percent in 2009. As a state, we have made progress in reducing tobacco use and the toll of tobacco on Oklahomans; however, we still have a long way to go.

Tobacco use is still our state's leading cause of preventable death. In spite of our progress, Oklahoma ranks at the bottom of the nation when it comes to the number of youth and adults who smoke and tobacco use costs us \$1 billion per year in direct medical costs alone.

It is also important to keep in mind that as tobacco use rates decline nationally, Master Settlement Agreement payments to the states, including Oklahoma, will also decline. If Oklahoma does nothing to reduce smoking among our youth and adults, we will continue to bear the high emotional, physical and economic costs of tobacco related diseases, and we will have less money available to treat them.

As the board and staff prepare for future funding of additional health programs, we remain committed to changing tobacco's impact on the health and economic well-being of Oklahomans.

This report will highlight some of the ways our partners throughout the state are working to reduce tobacco's toll in Oklahoma and collectively we say, "Tobacco Stops With Me."

VISION

Improving the Health of Every Oklahoman

MISSION

To improve the health and quality of life of all Oklahomans through accountable programs and services that address the hazards of tobacco use and other health issues.

VALUES & BEHAVIORS

- To encourage programs and initiatives that are based on the best research available, follow practices with proven results, and provide the best opportunity for success.
- To work cooperatively with other public and private organizations and funders to support joint efforts that will use funds efficiently, avoid duplication, minimize administrative expense, and provide the best opportunity for sustained activity.

- To make funding decisions based on the priorities of the Board and the merits of the proposal, independent of political influence and conflict of interest.
- To plan and encourage community-based comprehensive services for all areas of Oklahoma, including urban and rural communities.
- To encourage grantees to match grant monies awarded with monetary commitments and in-kind matches.
- To require measurable outcomes, appropriate evaluation, and annual evaluation reporting of all funded programs.

TSET grantees and statewide tobacco control partners stand together in support of Oklahoma's "Tobacco Stops With Me" message.

TSET OVERVIEW

Keeping the promise

Unlike other states, Oklahoma has kept the promise of the 1998 Master Settlement Agreement.

Oklahoma is the only state in the nation to have constitutionally protected the majority of the Master Settlement Agreement funds in an endowment to ensure a growing funding source dedicated to improving the health of Oklahomans for generations to come.

A 2000 constitutional amendment approved by voters by a 69 percent to 31 percent margin:

- Established the Oklahoma Tobacco Settlement Endowment Trust Fund (TSET) from which *only the earnings* may be spent on programs to improve the health of Oklahomans.
- Allocated the MSA payments, directing 75 percent to the endowment and the remaining 25 percent between the Oklahoma State Legislature

for appropriation and the Office of the Attorney General for the evidence fund.

- Established a five member Board of Investors to oversee the fund's investments.
- Established a seven member Board of Directors to strategically fund programs to improve the state's health.

Antler's Students Work Against Tobacco (SWAT) team spreading the word about Big Tobacco's lies and manipulation.

The Endowment is a long-term strategy to improve Oklahoma's health status. Earnings have gradually increased each year from a low of \$650,000 in FY 2002 to a high of \$15.5 million in FY 2009.

The Board of Directors is bipartisan with representation from each congressional district in the state. Additionally, each board member is appointed by a different appointing authority.

Earnings from the trust fund may be expended for the following purposes:

- Clinical and basic research and treatment efforts in Oklahoma for the purpose of enhancing efforts to prevent and combat cancer and other tobacco-related diseases;
- Cost-effective tobacco prevention and cessation programs;
- Programs designed to maintain or improve the health of Oklahomans or to enhance the provision of health care services to Oklahomans, with particular emphasis on such programs for children;
- Programs and services for the benefit of the children of Oklahoma, with particular emphasis on common and higher education, before- and after-school and pre-school programs, substance abuse prevention and treatment programs and other programs and services designed to improve the health and quality of life of children;
- Programs designed to enhance the health and well-being of senior adults.

The Board engages in regular strategic planning processes involving a review of research and input from key stakeholders including elected officials, private funders, state agency leadership, voluntary organizations, and health advocates from across the state. Stakeholders have overwhelmingly agreed that the board is on track with its mission to *improve the health of every Oklahoman by reducing Oklahoma's leading causes of death.*

- Oklahoma ranks last among states in *cardiovascular disease* deaths.
- *Cancer* is the second leading cause of death, affecting one out of three Oklahomans.
- *Tobacco use, physical inactivity, and poor nutrition* are the leading causes of cardiovascular disease and cancer.
- These preventable causes of death cost the state *billions of dollars* each year.

TSET-funded programs are based on strong evidence of effectiveness and rigorously evaluated. In the early years of the endowment, program funding was focused solely on supporting the *Oklahoma State Plan for Tobacco Use Prevention and Cessation*. The current strategic plan maintains a primary focus on reducing tobacco use while initiating programs to help fulfill the *Oklahoma Physical Activity & Nutrition State Plan*. In each case a statewide, comprehensive program is required to stem the tide of preventable disease, disability, and death. In addition, the board has funded research in tobacco control and is preparing to fund adult stem cell research in an effort to advance the prevention and treatment

of cancer and other tobacco-related diseases. Unsolicited proposals are also accepted to respond to emerging opportunities to improve health in our state.

Celebrating the tenth anniversary of the Master Settlement Agreement at the Oklahoma State Capitol.

Early signs of progress are beginning to be realized. Oklahoma has moved up in rank from 41st to 13th in the nation in funding for tobacco prevention. Last year, data from the Oklahoma Behavioral Risk Factor Surveillance System showed that Oklahoma's adult smoking prevalence rate moved below 25 percent for the first time since the endowment was established. According to the Oklahoma Youth Tobacco Survey, smoking among high school youth has dropped from 23.4 percent in 2007 to 20.2 percent.

OSU is Tobacco-Free.

One of my first priorities as new president at Oklahoma State University was to fully support a tobacco-free campus. No cigarettes, cigars, pipes or smokeless tobacco and lots of help to quit for good. I think it sends a positive message, not only to the university, but to the city of Stillwater that we value the health of our employees, our students and visitors to our campus. Numerous studies have shown that productivity increases without tobacco and absenteeism drops. Any way to promote greater health and a healthier bottom line has my full blessing.

TOBACCO STOPS WITH ME.

Oklahoma State University
President

PROGRAMS WE FUND

comprehensive tobacco control

People do not make behavior choices in isolation, but rather in a larger, complex context that includes the family, community, and culture; the economy and physical environment; formal and informal government policy; and the prevailing legal atmosphere. Programs to reduce tobacco use will be most effective if they address all the components that may influence the individual's behavior choices.

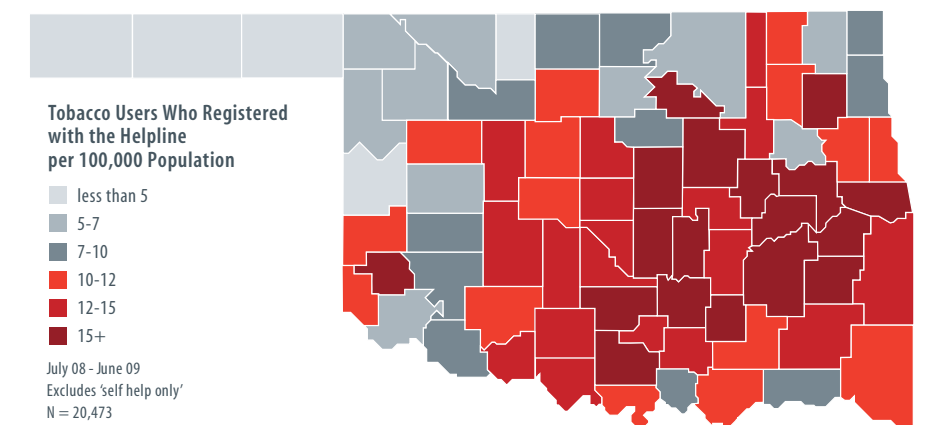

2000 Surgeon General's Report, Reducing Tobacco Use

OKLAHOMA TOBACCO HELPLINE

Launched in August 2003, the Helpline provides a series of free telephone-based tobacco cessation "coaching" sessions and free nicotine patches or gum. As funds have become available the budget has increased each year to meet the growing demand. The FY09 Helpline budget of \$5.59 million utilized a combination of \$4.25 million in TSET funds and \$1.34 million in funds from the Oklahoma State Department of Health and Centers for Disease Control and Prevention.

Utilization of the Helpline in Oklahoma reached record levels in FY09, with 37,855 tobacco users registering for services during the year. Tobacco users from all 77 counties contacted the Helpline for services in FY09. Follow-up evaluations with multiple-call participants at 7 months indicated that nearly 30 percent were abstinent from tobacco. This rate far exceeds the quit rate of 5 percent for those who go "cold turkey." Satisfaction with Helpline services remains high across all tobacco users who received either the single or multiple call interventions at 92 percent.

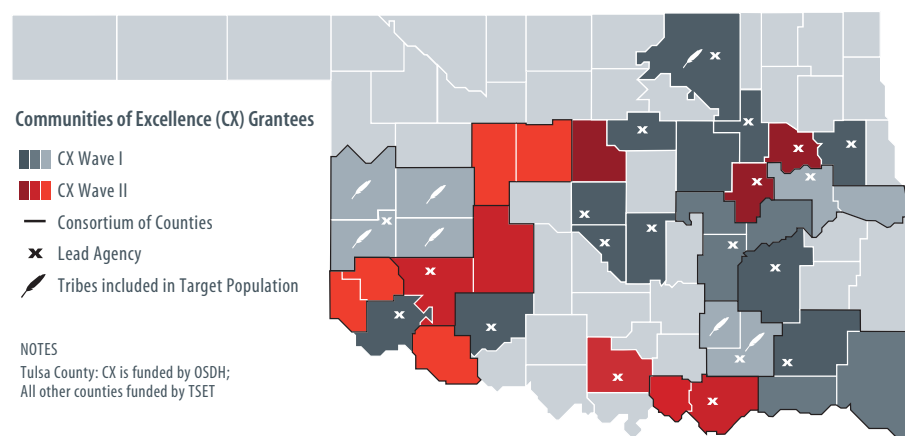

Norman SWAT celebrates Kick Butts Day by cleaning cigarette trash from a local park. Due to efforts by SWAT youth and the Tobacco Free Cleveland County Coalition, Norman passed tobacco-free park policy in June 2009.

COMMUNITIES OF EXCELLENCE IN TOBACCO CONTROL

Twenty-four community coalitions have been funded to implement comprehensive programs in 38 counties and two tribal nations, or about 70 percent of the state's population. Community grantees work with schools, businesses, health care providers, community leaders, and other partners to promote effective policies and programs to reduce tobacco use at the local level. The FY09 budget was \$4.49 million.

TOBACCO CESSATION SYSTEMS

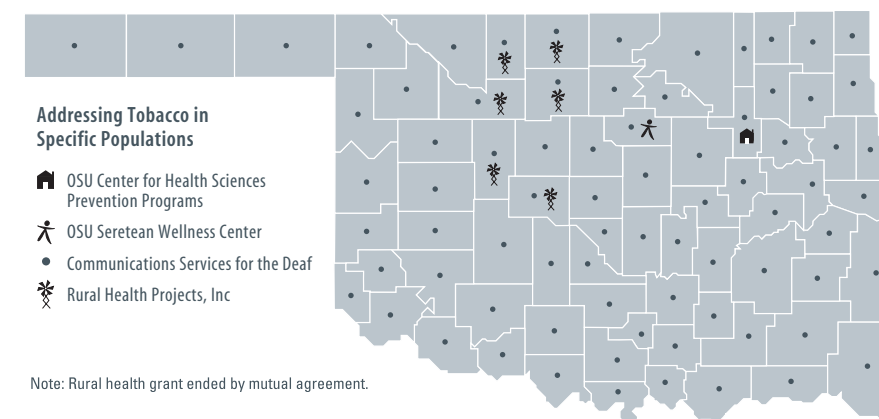

In January 2009, the Oklahoma Insurance Department, Oklahoma Hospital Association, Oklahoma Department of Mental Health and Substance Abuse Services were awarded grants to promote insurance coverage of tobacco cessation, promote tobacco cessation systems through hospitals and health systems, and integrate tobacco dependence treatment within mental health and substance abuse programs, respectively. The FY09 budget for the first six months of these grants was \$211,290.

Tahlequah City Hospital creates a tobacco-free campus encouraging those who use tobacco to quit and protecting all patients, visitors and workers from the dangers of secondhand smoke.

ADDRESSING TOBACCO IN SPECIFIC POPULATIONS

Four grantees have been funded to serve populations at high risk for tobacco use and tobacco related disease, including college students, the deaf and hard of hearing, and Oklahomans living in low income housing. The FY09 budget for these grants was \$400,000.

TOBACCO CONTROL PUBLIC EDUCATION HEALTH COMMUNICATIONS

When combined with other programs, mass media campaigns have proven to be one of the most effective strategies to prevent tobacco use, promote quitting, and reduce exposure to secondhand smoke. The TOBACCO STOPS WITH ME campaign highlights the ways tobacco use and secondhand smoke impacts the lives of Oklahomans and what people can

do to reduce the burden of tobacco in our state. Through a partnership with the National American Legacy Foundation, TSET leverages pre-produced ads to promote a national BecomeAnEx.org campaign and to promote the Oklahoma Tobacco Helpline locally. The total FY09 budget was \$3.5 million.

The Cherokee Nation passed a policy for all governmental campuses to be tobacco free. This included the historic courthouse in the town square of Tahlequah and all cultural grounds. The Nation supported the tobacco-free message by uptaking TOBACCO STOPS WITH ME and utilizing their own funding to post outdoor boards which featured Wilma Mankiller, former Cherokee Chief.

SouthEast Tobacco-Free Oklahoma Coalition's annual Great American Smokeout youth poster contest helps children understand the dangerous health effects of tobacco and how to make healthy choices by never using tobacco.

TOBACCO CONTROL TECHNICAL ASSISTANCE & TRAINING

To leverage federal and state resources, avoid duplication, and promote progress toward objectives, TSET has partnered with the Oklahoma State Department of Health,

Tobacco Use Prevention Service, to provide coordination, training and technical assistance for tobacco control grantees. The FY09 budget for this "State Program Office" was \$443,518.

TOBACCO CONTROL EVALUATION

A rigorous external evaluation of TSET-funded tobacco control programs is conducted by the University of Oklahoma College of

Public Health, Department of Biostatistics and Epidemiology. The FY09 budget for evaluation was \$677,000.

RESEARCH

The Oklahoma Tobacco Research Center (OTRC), a program of the OU Cancer Institute, was funded in FY07 to provide research to identify, evaluate, and disseminate best practices in tobacco control; translating

research to practice in Oklahoma. FY09 was the second year of a two year planning phase. A three year implementation phase will begin in FY10. The FY09 funding was \$710,000.

FITNESS & NUTRITION

In January 2009, the Indian Health Care Resource Center was awarded grant funding for a pilot program through the unsolicited proposals process. The program addresses tobacco, fitness, and nutrition utilizing the Coordinated Approach to Child Health (CATCH) program, community gardens, and similar approaches in twelve schools in Tulsa County. The FY09 budget for the six-month grant period was \$172,000. The Board is engaged in a strategic planning process to prepare for additional funding of fitness and nutrition programs in FY11.

CATCH program community garden at Addams Middle School funded by Indian Health Care Resource Center.

EMERGING OPPORTUNITIES

In late FY09, TSET earmarked \$5.5 million for Adult Stem Cell Research over a five year period. A planning process will begin with a convening of Oklahoma's stakeholders in Adult Stem Cell Research. A funding approach will be developed and grant funding is anticipated in FY10.

To address emerging opportunities to promote health in Oklahoma, TSET has initiated a process for accepting unsolicited proposals related to any of the purposes identified in the Constitutional amendment. Applicants must have direct third party funding for at least 50 percent of the proposed project. The FY09 budget for unsolicited proposals was \$500,000.

CONFERENCE SPONSORSHIPS

Conference sponsorships are available for statewide training events to educate and build capacity among Oklahomans for the purpose of improving the health of every Oklahoman. The FY09 budget was \$25,000.

Through efforts of the Tulsa Tobacco Free Coalition two large family-friendly venues adopted tobacco-free campuses, the Drillers Ballpark and Big Splash

Through efforts of the Tulsa Tobacco Free Coalition, two large family-friendly venues adopted tobacco-free campuses, the Drillers Ballpark and Big Splash.

Think workers aren't harmed by secondhand smoke?

THINK AGAIN.

StopsWithMe.com

LOOKING AHEAD

building momentum for health

In 2000, the voters of Oklahoma overwhelmingly supported the creation of the *Tobacco Settlement Endowment Trust* to improve the health and quality of life of all Oklahomans for generations to come. During these difficult economic times, it is more important than ever that we focus on the mission the voters supported by implementing strategies that will effectively produce dramatic reductions in our state's excessive rates of cardiovascular disease and cancer, and their leading causes — tobacco use, physical inactivity, and poor nutrition. Preventing and reducing the devastating personal and economic costs related to these preventable causes of death will prepare Oklahoma to be a healthier and more prosperous place to live, work, and learn for years to come.

In FY 2009 the Board of Directors issued a Request for Proposals for renewal of the *Communities of Excellence in Tobacco Control* (Wave I) grantees in FY 2010. Another Request for Proposals will be issued in FY 2010 to fund up to ten new grantees as Wave III of the program in FY 2011.

The Board of Directors also committed \$5.5 million in funding for Adult Stem Cell Research over a five and a half year period. As a result, FY 2010 will be a

planning year at \$500,000, followed by an additional five years of implementation at \$1 million per year. Early in FY 2010 the board will convene Oklahoma's stakeholders in Adult Stem Cell Research to identify the best approach to address this emerging opportunity to build Oklahoma excellence in one of the fastest growing areas of medical research and serve as a trusted resource for public information.

The board will continue an intensive and collaborative effort to plan and prepare to fund programs to address our state's epidemic of physical inactivity, poor nutrition, and obesity by FY 2011. At the same time, TSET-funded tobacco control programs, including the "Tobacco Stops With Me" campaign, *Communities of Excellence in Tobacco Control*, *Addressing Tobacco in Specific Populations*, *Oklahoma Tobacco Helpline*, and the *Cessation Systems Initiatives* will continue their collective efforts to prevent and reduce tobacco use among Oklahomans. These programs work hand-in-hand with tobacco control programs funded by the Oklahoma State Department of Health, the Centers for Disease Control and Prevention, Tribal Nations, voluntary organizations, professional associations, and many other dedicated organizations and individuals across the state.

Helping Employees Quit Tobacco:

For Physical & Fiscal Health

In just one year, Oklahoma saw an estimated six-fold return on investment from providing tobacco cessation products through the Oklahoma State & Education Employees Group Insurance plan, HealthChoice.

Reduced health care costs and increased productivity will continue to accrue savings over time.

It's much less expensive to reduce the chances of heart disease, cancer, stroke, chronic lung disease and other illnesses than to pay for medical treatment.

Helping employees quit tobacco simply makes good business sense. To find out how to help your employees and your bottom line visit: www.StopsWithMe.com.

TRUST GROWTH

investing in health

In spite of the worst financial crisis our nation has faced since the Great Depression, Fiscal Year 2009 was a record year for earnings on the investments of the Oklahoma Tobacco Settlement Endowment Trust Fund. In August, the Board of Investors certified more than \$17.8 million in earnings for Fiscal Year 2009.

These earnings reflect an increase of \$2.3 million or 14.5 percent over the funds made available last year from investment of Oklahoma's share of the tobacco settlement. Since becoming State Treasurer and chairman of the Board of Investors in 2005, annual earnings of the tobacco settlement endowment have more than tripled.

We are seeing these strong earnings due to two changes we made in investment strategy a few years ago. We negotiated new investment contracts to cut the fees paid and the portfolio was redistributed to generate additional certified earnings while protecting the principal value of the fund.

With 75 percent of Oklahoma's share of the national Master Settlement Agreement deposited for investment each year, the endowment is truly a strong, permanent source of funding to improve the health and lives of Oklahomans.

Cooperation between the two constitutionally-created boards is strong and I look forward to continued success in the years to come.

Sincerely,

A handwritten signature in black ink, reading "Scott Meacham".

MSA PAYMENTS

to the State of Oklahoma

Payments from the Master Settlement Agreement (MSA) to the State of Oklahoma began in FY2000. Tobacco settlement payments to the state are divided between the Endowment, the State Legislature, and the Office of the Attorney General. TSET's share of the MSA payments has increased from 50 percent in FY02 to 75 percent in FY07. From FY07 forward, TSET's share of the MSA payments will remain at 75 percent.

As tobacco use declines *nationally*, MSA payments to all states will be reduced. If Oklahoma does not keep pace with the rest of the nation in reducing tobacco use, the state will bear the burden of high health care costs due to tobacco-caused diseases as well as the declining settlement payments.

BOARD OF DIRECTORS

The seven-member board of directors is responsible for directing the earnings from the Endowment trust to fund programs to improve the health and well-being of all Oklahomans.

Initial appointed members served staggered terms of office, and subsequent appointed members serve seven-year terms. As specified in the Constitution, at least one appointee must be appointed from each Congressional district, and not more than two appointees may be appointed from any single Congressional district.

In addition, not more than four appointees may be from any one political party. All appointees must have demonstrated expertise in public or private health care or programs related to or for the benefit of children or senior adults.

Full biographies on the TSET board of directors can be found at www.tset.ok.gov.

BOARD OF INVESTORS

The five-member board of investors is responsible for safely and effectively investing the money entrusted to the trust fund to ensure a steady and growing flow of earnings to fund the programs initiated by the board of directors.

Initial appointed members served staggered terms of office, and subsequent appointed members serve four-year terms.

As specified in the Constitution, no more than two appointees may be appointed from any single Congressional district. All appointees must have demonstrated expertise in public or private investment funds management. The constitutional amendment approved by Oklahoma voters establishes the State Treasurer as the chair of the board of investors.
